

## Memorials In Hastings Cemetery (Sections A-G)

The database is arranged in alphabetical order of surname. It gives names, age, burial date, death date, grave number and some details of memorial and inscription and stone mason's name where available.

After 1932 the burial dates are usually not included as the very useful transcriptions by R.A. Longley finish at that date. You might find some variations in spelling between the registers and memorial . We have made entries for both where possible.

The last column of the spreadsheet picks out places, professions and anything else of interest.

We hope that this will encourage further research, there are moe books to be written about Hastings and St Leonards - our history and people.

This project has been the work of a dedicated group of volunteers, some of whom will continue to explore history in Hastings Cemetery. Please get in touch if you are interested in joining us.
